

CEMS Release Notes v.28

Release 28 for the Comdata Expense Management System (CEMS) is available on 7/12, and includes the following enhancements:

- **Resolve System Issues:** The following issues have been resolved:
 - Corrected an issue where carriage return values were added to the Notes column of the CMiC accounting file, which caused some lines in the file to fail
 - Corrected an issue where the Viewpoint accounting file truncated values in the Equipment Cost Category line. For example, a cost category of 5-40-500 displayed as 40 5 in the file. This fix allows the hyphens in the file so the full value can display 40-500 5
 - Corrected an issue where the Explorer Import did not include phase codes for all job codes
 - Corrected the Department field in the GLAccount table to accept up to 100,000 characters, which allows for several hundred department codes per company

These items will deploy Sunday, July 12 between the hours of 9:00 am and 10:00 am CDT with a 15 minute downtime after deployment is finished.

If you have questions about these new features or any other component of CEMS, please contact your Comdata Customer Relations Representative (CRR) at 1-800-749-7174.

You can also refer to the online CEMS user guide available through the **Help/Updates** link in the CEMS menu bar.
